Corporate Banking Services

A provider of quality banking in the Kingdom of Saudi Arabia, The Saudi Investment Bank believes in building long-term relationships with its clients - be they individuals, corporations or institutions.

One of the strengths of SAIB is our Corporate Banking Services, which we provide on a Kingdom-wide basis, through the Bank's head-office in Riyadh, and various branches in other parts of the Kingdom. Our clients are assured of prompt response, personalised services and tailor-made solutions to all their banking needs.

Import Finance

We offer a comprehensive range of services to facilitate and finance import needs. Documentary Letters of Credit, both at Sight and Deferred Payments, Standby Letters of Credit, Documentary Collections, Shipping Guarantees and Re-finance Facilities.

Export Finance

A growth area, particularly in the private sector; we provide a full range of services from initial status enquiries through back-to-back transactions and acceptance discounting.

Guarantees/Bonding

To complement your contract finance requirements, we issue a full range of guarantees - bid, performance, advance payment, retention and warranty.

Contract Finance

We cater to all your needs for supply contracts, operations and maintenance and the construction sector, tailoring each facility specifically to the contract terms.

Lease Financing

Devised principally to support the customers' equipment and other fixed assets acquisition. The advantage of lease financing over a normal commercial loan is that all financial charges inherent in leasing will be fixed and determinable in advance, therefore providing the client the advantage of projecting his cash flow over the life of the lease. Another advantage is the relatively long term period of repayment compared to an ordinary loan.
